

Curriki Grants Partnership

Help more schools use your AI Tool, For FREE

What we do for K-12 students

Curriki Grants delivers micro-grants to schools that want to implement proven, AI-powered EdTech tools, but lack the budget.

We identify tools with transformative potential and work with vendors like you to get them into classrooms quickly, responsibly, and with built-in evaluation.

How we support your efforts in transforming education

- **Grow Customer Reach** – Access underfunded schools who want your tool but can't afford it.
- **Zero Cost, Zero Obligation** – No fees or platform changes required.
- **Simple Workflow** – If a school can't afford your tool, send them to us—we fund it.
- **Pilot Proof** – Get data and stories from real classrooms.
- **Mission-Aligned Collaboration** – Join an equity-driven, innovation-focused initiative.

Partners we are looking for who share our mission are...

AI-powered EdTech tools that:

- Drive core learning gains (math, ELA, or other key subjects)
- Use AI to personalize or differentiate instruction
- Include built-in PD or teacher support
- Are easy to implement in diverse K-12 settings
- Align with ethical AI and student-centered learning

How to become a Curriki partnered AI EdTech tool

To ensure alignment and impact, Curriki conducts a brief review process before adding any tool to our approved partner list. As part of this process, we request **full access to your tool's paid version** so our team can evaluate it thoroughly. The **evaluation period lasts up to 90 days**, during which we assess the tool's **ease of use, instructional value, and AI-powered learning potential**. Access is kept **strictly within our internal review team** and is never shared externally. Once the review is complete and the tool is approved, your product is added to our **grant-eligible vendor list**, making it available for school applicants to request funding through Curriki.

How the grant process works

1. A school discovers your tool
2. They request a quote from you labeled with **"Curriki Grant"**.
3. The school submits the quote with their grant application
4. If Curriki approves the grant, the school issues a **purchase order (PO)** and becomes financially obligated
5. You **confirm** to Curriki that you've received a PO or that payment was received and services are being delivered prior to us reimbursing the school.
6. The school pays you directly and we reimburse the school with the grant money

Grants are provided quarterly with our first grant cycle in late 2025!

Let's start a conversation
